

**Declaration of contamination status of extruder or plant components
(Contamination Clearance Certificate)**

The presentation of a fully completed "Declaration of contamination status of extruder or plant components" is an essential requirement for equipment inspection and/or treatment by KraussMaffei Berstorff GmbH.

In case of operation-related contamination, the equipment owner/operator is required to perform decontamination of the extruder or plant component in accordance with applicable requirements before shipping the equipment to KraussMaffei Berstorff GmbH.

This Declaration must be completed by a qualified specialist and signed off by an authorized signatory.

Extruder / plant component reference data:

Service order number: Equipment type:
 Delivery note number: Serial number:
 P.O. number: Repair parts:
 Reason for return shipment: Attachment parts / Accessories:

Condition of extruder / plant component:

The extruder / plant component has been in operation: Yes No
 Type of oil / operating fluid used:
 The extruder / plant component has never been exposed to any substances hazardous to health and, consequently, does not present any health hazards:
 True (Continue with "Signature of qualified specialist")
 False (Continue with "Operation-related contamination of extruder / plant component")

Operation-related contamination of extruder / plant component:

- toxic substances Yes No
 - caustic substances Yes No
 - microbiological substances Yes No
 - explosive substances Yes No
 - radioactive substances Yes No
 - other substances hazardous to health Yes No

Type of substance hazardous to health or process-related hazardous reaction products to which the extruder / plant component has been exposed (provide further details on separate sheet, if applicable):

Commercial name Product name Manufacturer	Chemical name (and formula, if applicable)	Hazard class	Measures in case of release of substances hazardous to health	First aid measures in case of accidents

Decontamination measures already performed by the equipment owner/operator:

Instructions for further treatment of extruder / plant component:

Cleaning in a water-based and/or steam cleaning system up to a maximum temperature of 400°C can be performed without restriction: Yes No

If not: The extruder / plant component can be cleaned with the following detergent:

Parts to be scrapped can be disposed of without restriction: Yes No. Return shipment is at the owner's / operator's expense.

Additional measures required in accordance with the German Hazardous Substances Ordinance (GefStoffV):

The extruder / plant component has been decontaminated in accordance with the applicable requirements and does not contain and residues that may be hazardous to health:

Yes No. A written concession granted by KraussMaffei Berstorff GmbH on and material safety data sheets (..... pages) are attached.

Signature of qualified specialist

Date / Signature:

This is to certify that the information provided in this Declaration is correct and complete. Shipment of the equipment is in accordance with legal requirements.
